Third Assistant Postmaster General, tewas a great desire on the part of employer in the Post-Office Department to learn what he had to say about his recent letter to the Postmaster General, implying that a news-paper story, which Mr. Madden thought office of the First or Fourth Assistant Postmaster General.

It is known that Postmaster General Payne was piqued by the action of Mr. Mad den in giving the letter to the newspapers before it reached the Postmaster Gen-

disposing of routine business, and sent word to the reporters that he had no news. to the reporters that he had no news. The old story of the troubles between two time-clock companies has been revived and makes interesting reading. The story is told by N. K. Baker of the Dey concern who has filed charges with the First Assistant Postmaster General. It is in substance that, shortly before the four-year contract with the Bundy Company was signed by John W. Mastern, Chief Clerk of the Sal aries and Allowances Division a successful test of the Dey clock was made, but that the clock never got into the department George W. Beavers, ex-Superintendent of the division, is accused of having done all in his power to prevent the test from being made.

As announced by the District Attorney this morning, that the Grand Jury to-day brought in additional indictments against A. W. Machen and the Groff brothers, in the case of Machen for receiving a bribe and in the case of Groff brothers for giving a bribe in the matter of furnishing the Post Office Department with letter box fasteners. These indictments were brought into cover three additional counts and to put the first indictment on the same footing as the second, which latter involved the Lorenzes of Toledo in the charge of consultance to

The miners are at work now in the upper unnel, which is a self-draining hole. They have been going through dirt that assays from 12 to 18 per cent zinc, and had passed through a vein of ore some three feet in thickness that assayed fully 45 per cent. He had no news to make public to-day regarding the postal investigation. There are many rich mines in this lo-cality, but the Silver Hollow now bids fair to eclipse them all as a zinc producer. A mill is to be erected at once, and a force of fifty men put to work. Bargain-hunters yesterday: besleged the heavily stocked white goods departments at Nugents. Broadway and Washington avenue, in quest of the summer dainties of feted in the firm's big Sunday advertisement, which is adways interesting reading for the careful shopper.

Cold Junes are unprofitable for big concerns like Nugents, when a corps of buyers has scoured the markets of fashion for something to clothe a sweltering ropulate and finds that overcoats and blankets would have been more appropriate to the spasson, but it is an ill wind that blows nobody good. Hot weather in July is as certain as flaw-ers in May, and it is said that the longer summer is in coming the longer will it stay. If this he true, there is plenty of time for white goods and light fabrics, and surely there is nothing more stylish.

Patrons are to ret the benefits of this oversteeked condition at Nugents' and to appreciate the reductions offered it is necessary to visit the big store and inspect. Figures alone do not express the saving to buyers.

Providence has thrown the season a month behind, and these bargains consist of the newest and most durable line of dress goods, lingeric etc. that is possible to be found in the city. The sale will continue all through July and so large is the stock that all the firm's many customers can be supplied.
